

Canadian Society of
Combined Laboratory and
X-Ray Technologists

COMBINED LABORATORY **AND** X-RAY TECHNOLOGISTS

PLEASE REMEMBER TO FOLLOW ALL CURRENT PUBLIC HEALTH GUIDELINES WHILE CELEBRATING CLXT WEEK

Celebrate and Advocate

- 1. Organize a night out on the town** – Have fun and bond as a team by doing something fun and exciting. Examples include going out for food and beverages while supporting a local establishment. Other options are bowling, escape rooms etc. The key is to have fun away from the pressures for work.
- 2. Organize a potluck** – Whether at work or after hours, have fun trying new recipes or foods. Or show off your skills to your colleagues and perhaps learn new ones from each other. Bonus points if you can include other healthcare professionals and departments.
- 3. Organize and play games** – There are so many fun game ideas, just make sure you throw a lab or x-ray spin on it. Ideas include lab coat decorating contest, pin the tailbone on the skeleton, scavenger hunts etc.
- 4. Posters** – Design a poster to promote your profession and hang it up at your site. Or you can use one of our premade posters available on our website.
- 5. Pick a day and wear CLXT branded clothing** – We have partnered with The Front Line and get 20% for the month of October.

- 6. The best thing you can do is share** – Your role, your experiences and your expertise. Let people know what you do by telling them.
- 7. Teach** - Organize a lunch and learn to educate other health care professionals about the lab. Help those who you see daily understand your role and how it relates to patient care.
- 8. Host** - Host a tour and show your community what happens behind the lab doors. Invite your community mayor or local Member of Parliament to show them the importance of your department. (* Dependent on Local health guidelines)

Where we work

- 90% of CSCLXT members work front line and the other 10% work in leadership, administration, or post-secondary education.
- Our membership extends across Alberta, Saskatchewan, British Columbia, Manitoba, Yukon, and the Northwest Territories.
 - **66% work in rural (< 15,000)**
 - 9% Suburban (15–30,000)
 - 11% Urban (>30,000 – 1,300,000)
 - 14% Multisite/travel
- 75% CLXTs primarily work in the hospital setting while clinics as the second largest primary worksite.
- Some CLXTs have advanced authorization in medication preparation, transfusion medicine, IV, or bone densitometry.

CLXT Age Range

Membership Years of Service

Did you know???

The profession is unique because technologists are trained to perform radiography, core lab procedures and ECGs.

The objective of the CLXT profession is to have trained technologists to serve small community hospitals with 15 to 60 beds.

The CSCLXT was founded on March 26, 2015, with the purpose to advocate and promote the profession of CLXTs in Canada.
